

MUND
eco

SUSTAINABLE TECHNICAL SOCKS

MUND SOCKS enlarges its ECO line of products with technical socks for different activities, mainly Trekking and Running.

These socks have been manufactured with **natural and therapeutic fibers** as well as plastic recycled intelligent fibers. During the last two years we have been introducing ECO socks and ECO fibers in our catalogue. Our objective is to continue researching and testing **new sustainable materials and products**.

We firmly believe that, as manufacturers, we have to be responsible for our products manufacturing and contribute, as much as we can, to sustainability and planet care.

MUND SOCKS is a member of:

MUND FICTION new socks collection is manufactured with 80% of Organic Cotton which has the **GLOBAL ORGANIC TEXTILE (GOTS) certification** and the **TEX CLASS I of ECOLOGICAL PRODUCT certification**.

Organic Cotton is **beneficial for our environment and our health** since it is grown in fields free of pesticides, herbicides and synthetic chemical fertilizers, while it is produced and spun **without any toxic chemicals**. The final result is an **extremely soft** and comfortable fiber that guarantees full comfort to your feet.

MUND Socks is delighted to present this new line of **sustainable and fun socks**. A perfect complement in your wardrobe to give colour and joy to your everyday life.
